

FABRIC INFORMATION

CUSTOMER'S OWN LEATHER (COL):

Customer's leather must meet our standard of no more than three defects per hide. We use a conversion factor of 18 square feet per yard, unless otherwise noted herein, to determine the usable square footage for side chairs and executive seating. COL requirements on lounge pieces are noted within each lounge series. COL is priced as Grade 3.

ARCADIA VINYL:

Arcadia offers selected vinyl upholstery options in addition to accepting Customer's Own Vinyl (COV). To determine grade-in pricing for vinyls not included in Arcadia's standard program, please contact Customer Service for assistance. Customer's Own Vinyl (COV) is priced out as COM.

UPHOLSTERY COMBINATIONS:

For fabric, vinyl or leather upholstery combinations, pricing will be based on the following:

- › When combining two COM or COL fabrics, price will be COM or COL plus 5%.
- › When combining two fabrics of the same grade, price will be specified grade pricing plus 5%.
- › When combining two different grades of fabric, price will be based on the highest grade specified.

Please refer to pages 141-148 for examples of two-tone upholstery and yardage requirements.

MOISTURE BARRIER:

Arcadia offers an optional moisture barrier to seats only on all seating products. Please specify "-MB" next to chair model number and add \$40 List per seat.

FIRE RESISTANCE:

Due to the vast choice of fabrics with varying degrees of flame retardancy, we suggest you consult the published technical data of the fabric supplier. Fabrics, vinyl and/or leathers offered by Arcadia meet, as a minimum, California Technical Bulletin #117. Although this Bulletin relates to fabrics as well as resilient filling materials (i.e. foam and dacron), all Arcadia products conform to this standard. Consult the individual Arcadia fabric cards to review fabric specifications that are inherent in each fabric offered. Arcadia assumes no responsibility for the flame retardancy of any COM.

Certain jurisdictions require the use of additional fire retardants such as the regulation known as California Technical Bulletin #133. Arcadia provides compliance to this standard by way of application of a fire barrier. The cost of this flammability treatment is \$40 List, or as noted, per yard of fabric required for the unit specified. Labels indicating respective fire retardancy compliance levels are placed on the underside of all seating products when required.

FABRIC CARE AND MAINTENANCE:

Each Arcadia fabric card reflects the appropriate cleaning instruction code on the back panel of the card.

Code S

- › Only mild, pure water-free dry cleaning may be used for cleaning.
- › Cleaning by a professional furniture service is recommended.

Code W-S

- › Water base cleaning agents and foam may be used for cleaning. This fabric may also be cleaned with mild, water-free solvents.
- › Cleaning by a professional furniture service is recommended.

Cleaning of Arcadia leather, Luxor II and faux leather upholstery materials is as follows:

- › Remove as much soil or staining material by brushing or wiping with a soft cloth or similar material.
- › Use warm water and mild soap to remove most soil and stains.
- › Do not use furniture polishes, oils, solvents, abrasive cleaners, ammonia or wax.

ADDITIONAL FABRIC PROGRAMS:

Arcadia offers a selection of its own fabrics and leathers for upholstery. Refer to the presentation cards offered in our commercial catalog. Along with these fabrics, Arcadia, in conjunction with Architex, Maharam and Momentum, develops additional fabric programs to allow our customers to simplify the ordering of products and fabrics at one time. Most Architex, Maharam and Momentum upholstery fabrics are included in Arcadia price grades. Please refer to the Textile Partner Program brochure or contact Customer Service for additional information.
